

1. Preparing to travel

There is a lot to cover with the topic of Man. Start by asking your kids to list things that only humans can do? How are we different from the rest of creation? Point out that humans are special and unique.

2. On Board

**Origin of Man**

-Read Genesis 2:7. As an optional activity, have your child(ren) “create” their own man out of clay, sand, or even paper.

- - What are some major differences between the man that God created and the ones that we “create” out of clay? (Stress the importance that only God can grant life.)

-Next try and explain the “Big Bang Theory” and evolution in a way that your child(ren) can understand. Keep it basic and as simple as possible.

- - How does what we just read in the Genesis prove that man cannot have evolved from monkeys?

- - Can life come from nothing without God? Why do some people want to say humanity came into existence by accident?

3. Again talk with your child about how God has created man special. He has blessed and gifted us in many ways. Man has a purpose and a destiny. Pray with you child thanking God for how he has created them. And asking for guidance for His purpose and plan for their lives. Talk with them about their destiny and how they can share of Christ’s salvation.
